### **TASK 1:COOK YOUR FAV DISH**

Being at home in between contracts or during a lockdown as in recent times can offer opportunities to hone skills or learn new ones. There are two ways to learn new culinary skills – one is by trial and error at home, the other is by signing up for an online course. Online learning or virtual classrooms are gaining ground in the education sector, receiving an unlikely boost from the recent coronavirus pandemic.

In order to utilize time during pandemic period ,the NCC cadets of BCM College NCC unit conducted a competition on culinary activities by preparing variety of snacks and sweets. It was really a great experience in which we could learn to make use\_of every minute.

## TASK 2:-RAINWATER HARVESTING

As we all know rainwater harvesting helps utilities reduce peak demands during summer months, saving treated water for more important and appropriate water uses.

While rain water can be a perfect primary water source for many source, for many users and situations its also a great backup water supply for emergency situations . The NCC

cadets accomplished the task successfully on April 2020. All the NCC cadet gave their best part to their duty.

### **TASK 3: PLANT A HOPE FOR FUTURE**

Plants are really important for the planet and for all living things. Plantations of trees is important as they improve the life and fulfil essential needs of mankind. During photosynthesis, the trees breakdown food materials and consume carbon dioxide. Resultantly with the help of sunlight, the trees produce carbohydrates. Moreover, trees support life by providing habitat to different species such as squirrels, bees and birds. Trees cleanse the climate by absorbing carbon dioxide from the environment and releasing oxygen. The trees cool the environment through their leaves by absorbing the sun heat. Thus, there occurs cooling in the atmosphere. The trees provide shades to houses and streets.

Trees clean the air by absorbing harmful chemicals such as nitrogen oxide and removing dust particles from the air by absorbing them in their leaves. Another importance of planting trees is that they save the water from impurity. Trees stop water pollution by breaking the direct fall of rainfall to the ground.

The lockdown is an ideal time to try our hand at growing our own greens. We the NCC cadets of BCM College took initiative in planting a tree during this lockdown period. It turned to a great experience for all of us .

#### **TASK 4:PHYSICAL FITNESS WITH MOM**

Physical fitness is a state of health and well-being and more specifically, the ability to perform aspects of sports, occupations and daily activities. During the lockdown period ,the cadets actively participated in 'Physical fitness with mom' and made it a grand success. It gave a golden opportunity to spend time with their mothers.

### **TASK 5: CARTOON AND NOVEL REVIEW**

A cartoon is a type of illustration, sometimes animated, typically in a non-realistic or semi-realistic style. The specific meaning has evolved over time, but the modern usage usually refers to either: an image or series of images intended for satire, caricature, or humour; or a motion picture that relies on a sequence of illustrations for its animation.

A book review is a form of literary criticism in which a book is merely described or analysed based on content, style, and merit. A book review may be a primary source, opinion piece, summary review or scholarly review. We the NCC cadets did cartoon paintings and wrote book reviews of books read by us during the lockdown period. It was really a great experience for us. And also we inspired others too in doing such activities during pandemic period.

## **13.A VIDEO ON THE IMPORTANCE OF READING**

"There is no friend as loyal as a book", said American author Ernest Hemingway. Books fire up your imagination, provide solace in times of grief, and open up your world. The importance of a reading habit is intrinsically linked to professional success, as it opens up the mind to new experiences and provides new avenues

of knowledge. Reading can make you a better writer and speaker. Reading skills can take you a step ahead and help you achieve your objectives by customizing the way you read. If you choose the appropriate reading skill, it will enhance the reading process and help you achieve your goal.

During times of crisis, people find themselves faced with lifestyle changes. One of the earliest and most noticeable changes seen during the COVID-19 lockdown was how we consume media — and especially how we read. People tend to find comfort in certain books, and reading habits and genre preferences can change during periods of stress. This helps to explain why much genre fiction has roots in times of significant social, political or economic upheaval. We the NCC cadets utilized every minute during the lockdown period to grasp new things and to acquire more knowledge by reading books which boosted our minds.
