

Academic Year 2023-24

RESEARCH ACTIVITIES OF TEACHERS

The teachers of **Bishop Chulaparambil Memorial College** have consistently demonstrated a strong commitment to advancing research and academic excellence. Recognising the importance of fostering research skills, the college has implemented several initiatives aimed at enhancing the research capabilities of its faculty members. One of the most significant initiatives has been the formation of specialized clusters under the guidance of the **Research Development Cell (RDC)**. These clusters are formed based on faculty expertise in different disciplines, and each cluster works collaboratively to promote research and academic growth.

Research-Oriented Activities and Initiatives

As part of the college's annual academic calendar, every year on the **fourth day order**, teachers engage in presenting their research findings or conducting research-related sessions within their respective clusters. This initiative has proven to be highly effective in fostering a culture of knowledge exchange and encouraging peer feedback. It serves as an excellent platform for teachers to share their ongoing research, discuss emerging trends in their fields, and seek constructive feedback from colleagues. These presentations are not only instrumental in enhancing the research skills of the faculty but also provide an opportunity for cross-disciplinary collaboration.

Noteworthy Achievements in Research

In the academic year **2023-2024**, the teachers of Bishop Chulaparambil Memorial College have made remarkable strides in the realm of research. Several faculty members have published research articles in **national and international journals** that are listed in the prestigious **CARE (Consortium for Academic and Research Ethics)** database. These publications reflect the high-quality research being conducted within the college and highlight the faculty's dedication to contributing to global academic discourse.

Additionally, a number of teachers have been actively involved in **paper presentations** at various **national and international conferences and seminars**. This exposure not only enhances the reputation of the college but also provides faculty members with valuable networking opportunities and the chance to stay updated on the latest developments in their respective fields.

Faculty Contributions to Scholarly Literature

Furthermore, several faculty members have made significant contributions to the academic community through **book publications**. These books, covering diverse subjects, demonstrate the depth of knowledge and expertise possessed by the faculty. Book publications are a prestigious form of scholarly work, and their inclusion in the academic literature is a testament to the faculty's scholarly dedication and their role as thought leaders in their respective disciplines.

Institutional Support for Research

The **Research Development Cell** plays a crucial role in fostering an environment that supports and encourages research. Through its various programs, workshops, and seminars, the RDC provides ongoing support to faculty members at all stages of the research process, from conceptualization and writing to publication and presentation. The RDC's leadership ensures that teachers have the resources and opportunities necessary to excel in research, furthering the academic mission of the college.
