

**COLLABORATIONS WITH INDUSTRIES AND
ACADEMIA FOR RESEARCH
2025-2026**

BCM College actively promotes collaborative partnerships with industries, research organizations, academic institutions, and social organizations to strengthen research, innovation, and knowledge exchange. These collaborations are established through Memoranda of Understanding (MoUs) aimed at enhancing interdisciplinary research, promoting industry–academia interaction, and providing practical exposure to students and faculty. Through these partnerships, the institution facilitates joint research activities, internships, training programmes, workshops, consultancy services, and community-oriented projects. Collaborations with industries help in bridging the gap between theoretical knowledge and practical application, while academic partnerships encourage scholarly exchange, collaborative publications, and capacity building. Such initiatives contribute significantly to improving research quality, fostering innovation, and addressing societal and industrial challenges. The collaborations also provide opportunities for students and researchers to engage with experts from diverse fields, thereby enhancing employability, entrepreneurial skills, and professional development.

The following table presents the list of organizations with which BCM College has signed MoUs to promote collaborative research, academic exchange, and industry engagement.

TABLE 1. Organisation with which MoU is signed

SL.NO.	Organisation with which MoU is signed	Date of signing MoU
1	Josco Food Industries	2023
